Projects

GENDER AND AGE DETECTION

Age and gender, two of the key facial attributes, play a very foundational role in social interactions, making age and gender estimation from a face image an important task in intelligent applications, such as access control, human-computer interaction, law enforcement, marketing intelligence and visual surveillance, etc.

Technologies used: Python, Computer Vision, OpenCV and Convolutional Neural Network.

EVENT MANAGEMENT SYSTEM

The Event Management System is a simple project that can help an organization or business that needed an online or automated event registration and attendance system. This system has 2 sides of User Interface which is the admin side and the user side. This system stores multiple upcoming events along with the event's schedule, venue, and details

Technologies used: HTML, PHP, JavaScript and CSS.
